

Please replace paragraph [0082] with the following:

[0082] CPUs 2910 are also coupled to one or more input/output devices 890 that may include, but are not limited to, devices such as video monitors, track balls, mice, keyboards, microphones, touch-sensitive displays, transducer card readers, magnetic or paper tape readers, tablets, styluses, voice or handwriting recognizers, or other well-known input devices such as, of course, other computers. Finally, CPUs 2910 optionally may be coupled to a computer or telecommunications network, e.g., an Internet network or an intranet network, using a network connection as shown generally at 2995. With such a network connection, it is contemplated that the CPUs 2910 might receive information from the network, or might output information to the network in the course of performing the above-described method steps. Such information, which is often represented as a sequence of instructions to be executed using CPUs 2910, may be received from and outputted to the network, ~~for example, in the form of a computer data signal embodied in a carrier wave~~. The above-described devices and materials will be familiar to those of skill in the computer hardware and software arts.
